SUMMARY

React.js Frontend Developer specializing in building responsive single-page applications using modern React (Hooks, Context API, Redux Toolkit, React Router v6.4+). Hands-on experience with state management, routing, and REST API integration through projects like pizza ordering, travel tracking, quiz, and recipe search apps. Currently a Computer Science student (Zagazig University, expected 2026) and expanding full-stack skills through the NTI Full-Stack Development Program (Node.js, Express, MongoDB, Angular).

EDUCATION

- Zagazig University, Bachelor of Computer Science   2021 - present

TRAINING & COURSES

NTI – MEAN Stack: Web Developer Career Accelerator (210 Hours) — 2025 – Ongoing
- Intensive MEAN stack program (MongoDB, Express.js, Angular, Node.js) focusing on full-stack web app development, security, performance, and UI/UX.
- Covered freelance workflow: client communication, requirement analysis, SEO, project management, pricing, proposals, and portfolio building.

Udemy – The Ultimate React Course 2025: React, Next.js, Redux & More — 2025 – In Progress
- Advanced React and SPA development: Hooks, Context API, custom hooks, React Router v6.4+, state management (Redux Toolkit, React Query), performance optimization, and Tailwind CSS.
- Introduction to Next.js App Router with server components and real-world features like authentication, filtering, and pagination.

Creativa Innovation Hub, Zagazig – UI/UX Design Course (63 hours) — 2025 – Ongoing
-UI/UX fundamentals for web and mobile interfaces, focusing on user-centered design and practical design workflows.

Udemy – Node.js, Express, MongoDB & More: The Complete Bootcamp — Completed 2024
- Built a real-world RESTful API and server-side rendered app using Node.js, Express, MongoDB, and Mongoose.
- Developed authentication, authorization, security best practices, and advanced query features (filtering, sorting, pagination

Digital Egypt Pioneers Initiative (DEPI) – Frontend Web Development Track (~120 hours) 2024
- Covered core frontend technologies: HTML, CSS, JavaScript, and Angular basics.
- Built responsive web pages and interactive UI components focusing on layout, styling, and DOM manipulation.

EXPERIENCE

Fast React Pizza Co — React, React Router v6.4+, Redux Toolkit, Tailwind CSS   **2025**
  - Built a responsive single-page pizza ordering app with menu browsing, cart management, and order tracking against a REST API.
  - Managed global state using Redux Toolkit slices and async logic with createAsyncThunk (e.g., geolocation lookups, order submission).
  - Set up route-based data loading, form submissions, and error handling using React Router data APIs (loader, action).

WorldWise App — React, React Router, Context API, useReducer, Leaflet   **2025**
  - Developed a travel tracking app for managing visited cities and countries with nested routing and programmatic navigation.
  - Combined Context API with useReducer to centralize state management for city selection, filtering, and fake authentication.
  - Integrated interactive maps using Leaflet to visualize locations and visited places.

Recipe Finder App — React, Context API, React Router, CSS Modules, LocalStorage   **2025**
  - Built a recipe search application integrated with TheMealDB API, supporting search, recipe details, and favorites.
  - Managed global state with Context API and persisted favorites in LocalStorage to improve user experience.
  - Implemented responsive, reusable UI components styled with CSS Modules.

Additional Projects
  - React Quiz App — React, useReducer, API integration for quiz questions, scoring, and timers.
  - Redux Bank App — React, Redux Toolkit for global state handling deposits, withdrawals, and loans.
  - Natours Backend — Node.js, Express, MongoDB, JWT for a secure REST API with authentication, authorization, and advanced querying (filtering, sorting, pagination).

SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React (Hooks, Custom Hooks, Context API, useReducer, React Router v6.4+), Redux Toolkit, SPA development, CSS Modules, Tailwind CSS, Bootstrap, Angular

Backend: Node.js, Express.js, MongoDB (Mongoose)

Tools & Workflow: Git, GitHub, npm, VS Code, Postman, JSON Server, Leaflet, REST APIs, basic Agile workflow

Soft Skills: Problem solving, teamwork, communication, fast learning, adaptability

LANGUAGES

Arabic: Native

English: Intermediate (B1) – good reading and writing skills
